

MASTER THE FUTURE OF DISTRIBUTION CENTER

End-to-end solutions to boost speed, efficiency, and resilience

EFESO
MANAGEMENT CONSULTANTS

SUPPLY CHAIN MANAGEMENT,
DIGITAL TRANSFORMATION &
MANUFACTURING

INSIGHT

Distribution centers face increasing pressure from market volatility and operational complexity

VOLATILE MARKETS

Short delivery times,
fluctuating order volumes and
tax/tariffs

ADVANCED TECHNOLOGY

Low level of
automation and
digitization

INVENTORY CONTROL

High inventory levels and
limited warehouse space

WORKFORCE MGMT.

Workforce shortages, skill gaps, and high fluctuation

CALL FOR ACTION! **Optimize operations and secure future readiness**

Distribution centers must optimize processes, embrace automation, and empower workforce to meet customer demands and drive efficiency!

Answering the key questions defining tomorrow's distribution centers

Distribution center lifecycle		➤	STRATEGY	➤	REALIZATION	➤	OPERATION	➤
Key questions	 VOLATILE MARKETS	What role does the DC play in the network, and how can it be aligned with customer needs?		How should a DC be structured to ensure long-term operational flexibility?		How should operational processes be organized to manage peaks in demand?		
	 ADVANCED TECHNOLOGY	What does the tailor-made digitalization roadmap for the DC look like?		What is the optimal level of automation to target?		How can employee adoption of new technologies be encouraged?		
	 INVENTORY CONTROL	What does a future-proof warehouse strategy look like in today's supply network?		What measures should be taken to achieve storage compaction?		How can access times to critical articles be reduced?		
	 WORKFORCE MGMT.	What incentives can increase the attractiveness of the DC for new employees?		What is the ideal distribution of skills?		How can short-term staff shortages during the day be effectively managed?		

EFESO provides a comprehensive range of services to address all questions and concerns.

Together, we can transform your distribution center into a high-performance engine

10 – 30%
Improvement
OPEX

10 – 25%
Improvement
SERVICE LEVELS

DC Performance

Maximizing output with given resource input to drive cost efficiency and speed

EFESO's comprehensive support across the entire lifecycle of your distribution center

OUR SERVICES

Location search & site selection		Building design & permits	
DC concept		Implementation & ramp-up	
Smart warehouse		DC performance boost	
3D-Layout & simulation		Qualification & change management	

OUR SOLUTIONS

 Customer orientated	 Functional
 Efficient	 Flexible & scalable
 Smart	 Future orientated
 Transparent	 Green

The design and operation of the distribution center follow the customer and service orientation

DC strategy

Let's start the transformation together

Our

EFESO

Contribution

1

End-to-end expertise

Expertise across strategy, operations, planning, construction, technology, and digitization

2

Global delivery

Global delivery across all phases – from distribution center strategy and realization to performance improvement

3

Automation & digitization

Combining automation expertise with digital know-how and strong partners, we deliver cutting-edge solutions

4

Experience

Proven track record of delivering successful projects across diverse industries, showing deep expertise in distribution center development

“With EFESO we improved our performance significantly in two major distribution center – fast.

Their end-to-end assessment of processes, capacities and x-functional collaboration gave us not only the real pain points but also short and mid-term levers – ready to execute.

This is why EFESO is our partner of choice to improve our operational performance regarding distribution center.”

Sergio Bellacicco, VP Operations & Materials Management/ Supply Chain Europe, ZF
