

BURNING PASSION FOR BEST ASSET PERFORMANCE?

The combination of maintenance strategies, organizational development and digitization are a matter of course for you? Are you used to interdisciplinary collaboration, internally and externally, to increase asset performance? Then you should join our team.

SENIOR CONSULTANT / PROJECT MANAGER (F/M/D) FOR MAINTENANCE / ASSET PERFORMANCE MANAGEMENT 4.0

With more than 3,000 successful projects, we are the leading experts for Operational Excellence & Industry 4.0. As part of the EFESO Group with around 500 employees, we are one of the leading management consulting companies in Europe. For us, being an excellent employer means more than performance-based compensation and comprehensive social benefits. We support our employees in all phases both in their day-to-day work and in their long-term career planning.

WE OFFER

- › Flexible career options across departments and countries in a dynamic, global consulting environment with more than 30 locations
- › Practice-oriented onboarding, regular training and development measures tailored to your needs
- › A steep learning curve through varied tasks and projects with a high level of personal responsibility
- › A distinctive team culture with numerous employee offerings, such as shared lunches, employee parties or free physiotherapeutic massages in the office

YOUR PROFILE

- › Very good degree in engineering or industrial engineering with a technical focus
- › Sound knowledge and several years of professional experience in the field of technology and maintenance in industry in combination with experience in leadership and coordination of employees
- › Consulting experience in an implementation-oriented management consulting company
- › Convincing experience in increasing the efficiency of manufacturing and maintenance processes
- › Solid experience in phrasing and implementing maintenance strategies
- › Secured knowledge of organizational development of local engineering/maintenance departments as well as engineering/maintenance in corporate and network structures
- › A pronounced understanding and interest in the area of process digitization in maintenance incl. the design of the system landscape and mobile applications (e.g. AI based failure detection, asset data management, etc.).
- › Strong process orientation, high analytical, methodical and conceptual skills as well as proven implementation competence
- › Convincing and professional appearance as well as considerable teamwork skills
- › Excellent moderation and presentation skills and interest in individual training / development opportunities
- › High willingness to travel in your home country and abroad

YOUR TASKS

- › Interdisciplinary project work with well-known medium-sized and corporate customers
- › Independent project management for the design and implementation of digitized maintenance concepts
- › Teamwork oriented towards competence, experience and humanity
- › Active participation in internal knowledge management
