

STRONG PERFORMANCE IN COMPETITION

Dear ladies and gentlemen,

Transformation paths should not be taken alone – be it in terms of sustainability, digitalization, or innovative strength. A broader view of the value creation network helps to pool resources and achieve goals more effectively.

Pioneering success stories and starting points for cooperation can be found in the chemical sector, whose products form the foundation of many industrial value chains. They show that even long-term challenges can be solved more effectively and efficiently when skills are shared across industry boundaries.

In this issue of our newsletter, we present the results that companies achieve and the experience you can benefit from.

Best regards

Your team from ROI-EFESO

ACHIEVING SUSTAINABILITY GOALS, CREATING FINANCIAL VALUE

How do you reduce a plant's greenhouse gas emissions – and support this with a CapEx roadmap at the same time? Find out from Peter Wilms how the materials technology and recycling group Umicore is proceeding here.

JOINTLY TOWARDS A PROFITABLE CIRCULAR ECONOMY

The circular economy opens up a window of opportunity for European industry to leverage its innovative strength and reduce costs. Our article explains how the automotive and chemical industries are already working together to achieve this.

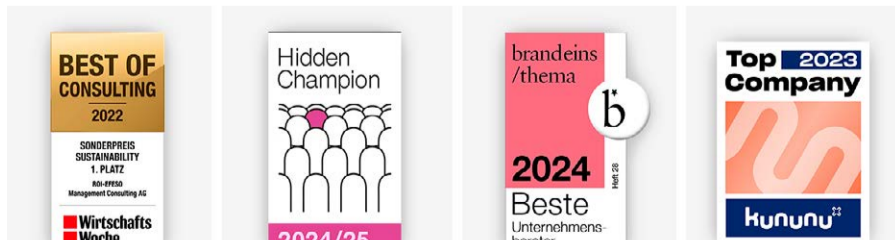

USING THE EXPERIENCE OF SUSTAINABILITY PIONEERS

What initiates and strengthens the commitment to sustainability in organizations? And how do you stay on the ball when implementing long-term objectives? Fernando Cruzado names success factors for sustainability projects that work in the chemical sector and other industries.

JUNE 7, 2024

REALIZING A SUSTAINABLE FUTURE

Experience in the port of Antwerp-Bruges how companies reduce greenhouse gases and reconcile this with profitability, quality, and cost efficiency. Best practice examples will be presented by industry decision-makers such as Veerle Slenders, EVP at Umicore, Ralf Duessel, EVP Sustainability at Evonik and Frédéric Dunon, Deputy CEO of Elia.
