

“BEST IN CLASS” IN THE INDUSTRY

Achieving and keeping top performance

The title "Best in Class" is usually hard-earned and defended with consistently high standards. Many companies in the manufacturing industry achieve this by combining technological excellence with a clear strategic direction and a culture that fosters top performance.

"Best in Class" companies also invest in their employees. After all, their expertise, commitment, and innovative strength ensure the company’s ability to act and its future viability, even in challenging times.

This newsletter explores how pioneers across industries pursue a "Best in Class" ambition and maintain their leading positions.

We wish you an informative and inspiring read.

Best regards
Your team from EFESO

BUILDING A GLOBAL CORPORATE CULTURE

To create a shared corporate culture and establish efficient structures, the Bell Food Group developed a group-wide transformation program together with EFESO. This delivered top results and received an award from the University of St. Gallen as a "Best in Class" management system.

HIDDEN CHAMPIONS OF THE CONSULTING MARKET

EFESO has once again successfully positioned itself in the WGMB study "Hidden Champions of the Consulting Market." The surveyed industry decision-makers confirmed our first place in the discipline “Engineering & Production”—for the sixth time in a row since 2015.

COMBINE FLEXIBILITY AND EFFICIENCY

Strengthen the resilience and adaptability of your production. Our article describes how efficiency and flexibility can be combined in a hybrid footprint.

INCREASING PROFITABILITY

Professionalize your claim management and prepare your company for periods of inflation and deflation. Our insight names the results achieved by "Best in Class" automotive suppliers in increasing their profitability.

REALIZING THE FACTORY OF THE FUTURE

Discover how a manufacturer of special machinery worked with our team to create a bespoke factory of the future – from drawing board sketches to the operational factory itself.
