

SMART SUMMER READING

Ideas for vacation mode and everyday work: EFESO reading recommendations

Vacation time is reading time. In this newsletter issue, we share our recommendations - perfect for quick reading sessions between meetings, while traveling, or over your first cup of coffee during a well-deserved break.

We hope you find the reading inspiring and gain plenty of great ideas for the second half of the year.

Best regards
Your team from EFESO

INTERVIEW: AI IMPACT

Discover how Industrial AI brings production and automation closer together. In this interview, Dr. Niels Syassen, Member of the Executive Board at SICK AG, explains the hallmarks of successful Industry 4.0 projects and names AI use cases that drive manufacturing companies forward.

BEST PRACTICE: COST REDUCTION

Discover how industrial companies reduce costs with EFESO without losing sight of performance. Our case studies highlight recommended approaches and deliver clear, real-world results.

ADDED VALUE: GEN AI IN PROCUREMENT

GenAI offers procurement organisations enormous potential for process automation and optimization, e.g. in the management of supplier information. Targeted, disciplined scaling of GenAI is becoming increasingly important. Our EFESO CPO Annual Pulse Report 2026 describes practical experiences with GenAI from CPOs in various industries.

BENCHMARK: PERFORMANCE CHECK

Determine how your company performs in key areas - such as procurement, R&D, or cost optimization - compared to top performers across various industries. Our free industry benchmark quickly provides a clear roadmap for your transformation.
