

WHERE THE FUTURE GETS MADE

Turning opportunities into measurable progress

Tomorrow’s industry is built not on visions but on decisions that consistently translate technology, market requirements, and operational realities into action.

Along the way, it is often worth shifting the perspective from “either/or” to “both/and”: powerful combinations can emerge from efficiency and resilience, automation and adaptability, technology and execution capabilities.

In this issue of our newsletter, discover how companies across different industries are already turning these and other priorities into a forward-looking agenda.

We wish you an informative and inspiring read.
Best regards

Your team from EFESO

USING AI IN INDUSTRY

Use AI as an efficiency booster in R&D, production, procurement, and SCM. We highlight specific application areas and benchmark KPIs for an AI-driven value chain.

CREATING A FUTURE FACTORY

Benefit from the experience of a special-purpose machinery manufacturer with whom we developed a customized “Factory of the Future.” Our case study summarizes the project’s success aspects.

REALIZING GROWTH POTENTIALS

Our new industry paper explains how industrial manufacturing companies are realigning their value creation, using Operational Excellence as a platform for transformation, and opening up new avenues for growth.

MEASURING WHAT MATTERS

Determine how your company performs compared to top performers across various industries. Our free industry benchmark quickly provides a clear roadmap for your transformation in key areas such as procurement, R&D, and cost optimization.
